ABSTRACT

An **Art Gallery Website** makes it easy to showcase, buy, bidding artwork and sell artwork online. It allows artists to display their creations to a global audience, and users can explore and purchase art from anywhere. It helps manage everything, like uploading art, and connecting with buyers, all in one place.

It is relevant for making art more accessible, convenient, and modern, breaking geographical barriers, supporting emerging artists, and promoting the digital transformation of the art market while ensuring efficient operations and a user-friendly experience. The technologies used in this website include Front-end are HTML,CSS,JAVASCRIPT, Back-end are used PHP, Database MySQL.

Modules with Functionalities:

User Features :

- Secure user registration and login.
- Explore the art gallery and search for artworks.
- View detailed information about artworks.
- Purchase artworks securely.
- Save favorite artworks to a wishlist.
- Provide feedback or reviews for artworks.
- Place bids on artworks listed for bidding
- View active bids and bidding history
- Secure payment for winning bids
